

TPOPP

Transportable Physician Orders for Patient Preferences

ENDORSEMENTS

Transportable Physician Orders for Patient Preferences (TPOPP) is a Kansas-Missouri initiative sponsored by the Center for Practical Bioethics with the support of the University of Kansas Hospital and many community-based organizations. The initiative is an approach to end-of-life planning based on conversations between patients, loved ones and healthcare professionals. TPOPP is designed to ensure that seriously ill or frail patients can choose the treatments they want or do not want and that their wishes are documented and honored.

The following institutions, professional associations, entities and individuals have reviewed the content and endorse the implementation of the TPOPP initiative (listed alphabetically):
